# RECRUIT™

## Features & Benefits

There is not a more challenging operational function than that of the “chasing and placing” of an appraisal order. Finding appraisers through basis Internet searches is neither compliant nor efficient. Clearbox maintains the most readily available data on appraisers than can be found anywhere.

This is our core competency. The foundation of what we do is to maintain a database of every licensed appraiser in the U.S. Let us work for you finding appraisers, 24/7, anywhere and everywhere.

With the simple click of a mouse you can send an email to a group of appraisers in any given geographic area. Recruiting made easy.

## Appraisal Management Companies

It simply is not sustainable to maintain full time employees devoted to random search processes. In today's world, you need to be efficient in order to thrive. Don't spend hours or even days locating the best appraiser for each assignment. To be competitive and profitable, Clearbox is your survival tool.

## Lenders

If you wish to build your own panel, Clearbox is the only choice.

## Appraisers

Appraisers really do want to be found. We constantly update and refine our database and remove anyone who is not available for fee work.
