Ler	nder Sample Lender/Client			
	This report was prepared under the fo	ollowing USPAP reporting option:		
	Appraisal Report	This report was prepared in accordance with USPAP Standards F	Sule 2-2(a)	
	Restricted Appraisal Report	This report was prepared in accordance with USPAP Standards R	{ule 2-2(b).	
	<u>г</u>			
	Reasonable Exposure Time			
	My opinion of a reasonable exposure time	for the subject property at the market value stated in this report is:	Within 1-1	80 days.
	This estimated exposure time is based on a	a market analysis completed within the subject's market area during the	e course of this assignm	ent and includes any
	active listings, contract sales and closed sa	les utilized in the sales comparison analysis which best reflect typical o	comparable buyer/seller	market activity under the
	current market conditions. Also see form 1	004 MC addendum. USPAP definition of exposure time is as follows:	The estimated length of	time that the property
	interest being appraised would have been of	offered on the market prior to the hypothetical consummation of a sale	at market value on the e	effective date of the
	appraisal.

This Report is one of the following types:

2-2(a) , pursuant to the Scope of Work, as disclosed elsewhere in this report.) X Appraisal Report (A written report prepared under Standards Rule (A written report prepared under Standards Rule 2-2(b), pursuant to the Scope of Work, as disclosed elsewhere in this report, restricted to the stated intended use only by the specified client and any other named intended user(s).) Restricted Appraisal Report

Comments on Standards Rule 2-3

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.

- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial, and unbiased professional analyses, opinions, and conclusions.

- Unless otherwise indicated. I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved. - Unless otherwise indicated, I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

- I have no bias with respect to the property that is the subject of this report or the parties involved with this assignment.

- My engagement in this assignment was not contingent upon developing or reporting predetermined results.

- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal. - My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice that were in effect at the time this report was prepared.

- Unless otherwise indicated, I have made a personal inspection of the property that is the subject of this report.

- Unless otherwise indicated, no one provided significant real property appraisal assistance to the person(s) signing this certification (if there are exceptions, the name of each individual providing significant real property appraisal assistance is stated elsewhere in this report).

Reasonable Exposure Time

(USPAP defines Exposure Time as the estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal.) My Opinion of Reasonable Exposure Time for the subject property at the market value stated in this report is: Within 1-180 days.

This estimated exposure time is based on a market analysis completed within the subject's market area during the course of this assignment and includes any active listings, contract sales and closed sales utilized in the sales comparison analysis which best reflect typical comparable buyer/seller market activity under the current market conditions. Also see form 1004 MC addendum. USPAP definition of exposure time is as follows: The estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal

Comments on Appraisal and Report Identification

Note any USPAP-related issues requiring disclosure and any state mandated requirements:

*The appraiser, as indicated in the signature section of this report, further states that he has NOT provided ANY prior services in any capacity involving the subject property within the last 36 months immediately preceding the acceptance of this appraisal assignment.

Uniform Residential Appraisal Report

File # Sample File #

Conditions of the Appraisal: This report has been electronically prepared in compliance with USPAP guidelines which includes a secure digital signature and adequate security measures in place to protect the data produced by the appraiser. The intended user of this appraisal report is Sample Lender/Client. The intended use is to evaluate the property that is the subject of this appraisal for a Sample Appraisal Report, subject to the scope of work, purpose of the appraisal, reporting requirements of this appraisal report form, and definition of market value. No additional intended users are identified by the appraiser. The appraiser certifies that the lender or the AMC did not improperly influence, or attempt to influence, the outcome of this appraisal by doing any of the things prohibited by section 1 (b) of the appraiser independence requirements, effective 10/15/2010.

***The subject property improvements were measured by the appraiser using an industry standard laser measuring device and measuring tape. The subject improvements were measured to the nearest inch, and the total GLA was rounded to the nearest whole foot in accordance with the ANSI Z765-2021 standard for measuring and calculating the finished and/or unfinished square footage of residential dwellings. The subject's square footage per tax records is approximately 4,218 sf. The appraiser measured the subject's GLA at approximately 3,175 sf. Differences between the appraiser's measurements and county tax records square footage are common in this market and are typically a result of the various devices, methods and techniques employed by the assessor's office to measure and calculate square footage for the tax assessor's purposes. An analysis of tax records and the county building sketch diagram indicated that the primary reason for the discrepancies noted above are that the county tax assessor's office has included the detached guest house (ADU) and the below grade basement area in the subject's total square footage. Since these areas cannot be included in the subject's total GLA per ANSI requirements, the subject's reported square footage is as measured by the appraiser at the time of inspection. ***The appraiser also noted comparable sales used in this report which reflect incorrect square footages and/or room counts with basement areas, and/or guest houses included in the total square footage and bedroom/bathroom counts for the comps in MLS and/or tax records. Therefore, the GLA and room counts for those comps varies from what is reported in MLS and tax records as the appraiser had to manually subtract the basement areas and/or guest house square footages from these comps using the tax records building sketch diagram, or agent square footage/room count break-down in the MLS comments.

***The appraiser has not identified any purchaser, borrower or seller as an intended user of this appraisal, and no such party should use or rely on this appraisal for any purpose. Such parties are advised to obtain an appraisal from an appraiser of their own choosing if they require an appraisal for their own use. Any reference to or use of this appraisal report by a purchaser, borrower or seller for their own purposes, including without limitation for the purposes of a property purchase decision or an appraisal contingency in a purchase agreement, is at such party's own risk and is not intended or authorized by the appraiser.

Appraisal Fee Disclosure: The agreed upon fee to be paid to the appraiser for this appraisal assignment from the engaging Appraisal Management Company is \$Sample.

AMC Arizona License Number: 00000

Prior Services Disclosure: The appraiser, as indicated in the signature section of this report, further states that he has NOT provided ANY prior services in any capacity involving the subject property within the last 36 months immediately preceding the acceptance of this appraisal assignment.

COST APPROACH TO VALUE (not required by Fannie Mae)

Provide adequate information for the lender/client to replicate the below cost figures and calculations.							
Support for the opinion of site value (summary of comparable land sales or other methods for estimating site value) Given the subject's actual age, and due to a lack							
of relevant comparable vacant land sales in the market at this time, the extraction method was primarily relied upon to determine the subject's site							
value for the purposes of this appraisal. Therefore, least weight is placed	on the cost approach to value which is included for informational						
purposes per client request only. The cost approach is not intended to be	purposes per client request only. The cost approach is not intended to be used for insurance purposes.						
ESTIMATED 🔲 REPRODUCTION OR 🗙 REPLACEMENT COST NEW	OPINION OF SITE VALUE =\$

Are the common elements leased to or by the Homeowners' Association?	No If Yes, describe the rental terms and options.						
Describe common elements and recreational facilities.							

Freddie Mac Form 70 March 2005

Fannie Mae Form 1004 March 2005

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

File # Sample File #

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

City	Chandler	County Maricopa	State AZ	Zip Code 85224
Lender/Client	Sample Lender/Client			

***The subject does NOT have a difference physical address from the mailing address. Both the physical address and mailing address are the same for the subject.

URAR: Neighborhood - Description

Subject is located in a suburban portion of the city of Chandler, located in Maricopa County, and is within the neighborhood known as Indian Ridge Estates. This neighborhood primarily consists of residential single family dwellings which are complimented by a mix of multi-family and commercial land use improvements which are typical for this area.

The subject property appears typical and conforming within the neighborhood, and is not considered an under improvement, or and over improvement. Subject's actual age is also typical for the neighborhood and within the neighborhood age range.

Additional 5% of present land use labeled as "Other" primarily reflects utility easements, parks and recreational areas, and public use areas which are typical for this area. These areas have no negative effect on the subject's marketability at this time.

URAR: Neighborhood - Market Conditions

The subject's market area appears to be currently experiencing stable market conditions.

A data search was performed within subject's market area for comparable sales similar in size between 2,500-6,000 SF which are also similar in bedroom and bathroom count to reflect similar functional utility, similar in location within a 4 mile radius, age, overall condition, design, quality of construction, and lot size and utility. This search was conducted within the last 12 months prior to the effective date of this appraisal as indicated in the 1004 MC addendum attached to this report which revealed the following results: Approximately 35 comparable sales were noted and 3 current comparable listings found; 0 of which were REO/foreclosures and 0 of which are short sales.

Currently, there is a shortage of inventory being seen in the area. Sales prices had been consistently increasing in previous years and declined during the second half of 2022 a result of record high sales prices and record low interest rates meeting with increasing inflation and increasing interest rates. This slowed market activity resulting in a market correction cycle, stabilizing sales prices, and lower overall available inventory due to a decline in buyer/seller market participation. However, the lack of inventory kept demand high during that time and as a result, sales prices have remained stable. The number of days on market for sales and listings are stable within 1-180 days. List price to sales price ratios typical for the area and stable. Foreclosures and short sales are not typical in the market at this time. These indicators, along with stable median sales prices and stable median list prices indicate the market is currently experiencing stable market conditions. Current primary value indicators are GLA, design, view, condition, quality of construction, location, view, lot size, site amenities, and parking amenities.

URAR: Site - Highest and Best Use

Highest and best use is based on current zoning laws, location, lot size, functional utility, design, and predominant land use. The subject property is currently being used at it's highest and best use as it is legally permissible, physically possible, financially feasible and maximally productive for this property type in this location. The subject's highest and best use as if vacant is also currently as-is based on the same criteria analyzed above.

URAR: Site - Adverse Conditions or External Factors

Site appears typical for the area with circular concrete driveway, covered patio, balcony, storage shed, workshop, detached full guest house, in-ground pool and spa, finished mature front and rear yard landscaping, and block fenced rear yard. No adverse external factors, easements, encroachments, or conditions noted. Zoning and FEMA flood designations are typical for area.

***Septic waste water systems are typical for the neighborhood. The subject's septic system is underground and therefore could not be adequately inspected by the appraiser. However, the appraiser did NOT note any signs or conditions on site at the time of inspection that would indicate there are any existing deficiencies with the subject's septic system. However, this statement includes the use of an extraordinary assumption that if found to be false, could have an impact on the result, opinions and conclusions contained in this report, and a professional licensed septic system inspector can be consulted for more reliable results, opinions and conclusions with regards to the adequacy of the subject's septic system. The subject's septic system is a private on-site system which is not shared which is common in the neighborhood. Septic systems have no adverse impact on value or marketability based on comps 1, 2, 3, 5, 8 and 9 which all have a similar on-site private septic systems as the subject.

URAR: Improvements - Additional Features

Additional features include updated kitchen with solid surface countertops, wood block countertops on center island, custom brick back splash, updated appliances including double wall ovens, and updated cabinets, updated 1/2 bathrooms with modern fixtures and vanity, newly updated interior paint and laminate wood flooring in living room, carpeted bedrooms, mirrored closet doors, walk-in closet in primary bathroom with separate shower, "jetted" tub, and dual vanity sinks, fireplace in living room, primary bedroom, and basement rec-room, updated trim and finishes including crown molding, built-in cabinets, recessed lighting, ceiling fans, built-in sound speaker system with built-in intercom system, detached guest house, upgraded tankless water heater, covered patios and balconies, in-ground pool and spa, detached shed and workshop, and fully finished basement.

***The subject's finished basement includes a large rec-room with fireplace and to 2 smaller den areas off to the side which are not separate from the rec-room by any walls, and are only separated by the basement staircase. The basement is finished with the same quality materials, features, finishes and amenities as the main dwelling, and is fully accessible from the interior of the main dwelling. These types of additional below grade living spaces are common throughout this market area. The appraiser did not note the presence of any sump pump in the basement at the time of inspection. However, the subject's basement does have large exterior windows with adequate egress to the outside of the dwelling in the event of an emergency such as a fire or flood. Since this space is below grade, and the appraiser is required to measure the subject's dwelling in accordance with the ANSI Z765-2021 standard for measuring and calculating the finished and/or unfinished square footage of residential dwellings for the purposes of this appraisal, the basement area is not included in the subject's total square footage or room count totals and is instead valued as a separate line item in the sales comparison analysis grid. No adverse basement conditions including but not limited to dampness, seepage, or settlement were noted by the appraiser. No health or safety hazards were noted by the appraiser in the basement area.

Supplemental Addendum

Borrower	Sample Borrower				
Property Address	Sample Report 2				
City	Chandler	County Maricopa	State AZ	Zip Code 85224	
Lender/Client	Sample Lender/Client				

***The subject also has a detached full guest house (ADU) on site which consists of a living room, bedroom, full bathroom, and full kitchen with eat-in space. These types of Accessory Dwellings Units are typical for the market area and have no adverse impact on value or marketability. The subject's ADU is fully finished, appears to have been finished in a workmanlike manor, reflects a similar fit, finish and quality of construction as the main house, and appears typical and conforming with the main house and overall neighborhood. The guest house has an exterior entry/access only and does not have any direct interior access to the main house. The guest house does not have a separate address of it's own, and operates under the main house utility system. These types of guest houses are allowed under the current zoning laws for this neighborhood. Therefore, the subject's ADU could be rebuilt "as-is" if it were destroyed. The subject therefore is being appraised "as-is," and the subject's highest and best use is "as-is" as a single family dwelling with a full detached Guest House (ADU). Since the appraiser is required to measure the subject's dwelling in accordance with the ANSI Z765-2021 standard for measuring and calculating the finished and/or unfinished square footage of residential dwellings for the purposes of this appraisal, and the guest house is not accessible from the interior of the main dwelling, it is cannot be included in the subject's total square footage or room count totals and is instead valued as a separate line item in the sales comparison analysis grid. No health or safety hazards were noted with the guest house at the time of inspection.

URAR: Subject - Overall Condition of the Property

Subject appears in C4 condition with no apparent adverse functional inadequacies existing. Condition rating and difference between effective age and actual age is typical for the area and reflects more original features than updates still in place throughout with normal moderate wear and tear with some moderate updates completed. Kitchen updates including newer paint, appliances, countertops, and fixtures. The subject's 1/2 Bathroom has been updated with modern fixtures and amenities. All other bathrooms appear mostly original.

***The exterior wall area of the upstairs balcony over the subject's entry area appears to have some settlement cracks in the bricks that appear to be linear along the mortar lines between the bricks behind the stucco exterior. There does not appear to be any structural damage or deficiencies, and the area appears to be settlement related only. No health or safety hazards noted. No obvious structural deficiencies or safety hazards were noted. This appears to be an isolated condition. However, since the appraiser is not licensed or qualified to adequately identify the extent of such conditions, these statements include the use of an extraordinary assumption that if found to be false, could have an impact on the results, opinions and conclusions contained in this report. A license engineer can be consulted if necessary for more reliable results, opinions and conclusions withy regards to this matter. However, based on the appraiser's observations, an inspection is only recommended by the appraiser and is not required as a condition of this report. Therefore, the subject is being appraised "as-is."

• URAR: Sales Comparison Analysis - Summary of Sales Comparison Approach

Unless stated otherwise, all comparable sales utilized are located in subject's market area, and are considered to be the best of the available market indicators at the time of appraisal. All adjustments made are abstracted from market data and are intended to reflect the current estimated market reaction to differentials between primary value indicators presented at this time.

Sales concessions are normally within 1-6% in the market at this time and typically reflect seller paid closing costs which are customary within the market. No adjustments are made for seller paid concessions due to lack of market support for the differentials presented at this time which is based on a comparison analysis of the comps used in this report. Special and creative financing are not typical in the market at this time.

Comp 1 is located on the same street as the subject.

Lot size adjustments are calculated at approximately \$5.00/sf residual land in excess of 1,000 sf and are based on a comparison analysis of the comps used in this report.

Design adjustments made throughout for differentials between single-level dwellings and multi-level dwellings are calculated at approximately 2% of sales price and are based on a comparison analysis of the comps used in this report to reflect the current estimated market reaction to differences in functional utility and overall efficiency.

No age adjustments are made throughout due to lack of market support for the differentials presented as most dwellings in this market have been updated and/or upgraded to some degree at this point in their life cycle making effective more relevant which is best reflected under any condition adjustments necessary.

No bedroom count adjustments are made throughout due to lack of market support for the differentials presented at this time.

Bathroom adjustments are made at approximately \$10,000 per full bathroom and \$5,000 per 1/2 bathroom and are based on a comparison analysis of the comps used in this report to reflect the current estimated market reaction to functional utility within this design and GLA range.

GLA adjustments are calculated at approximately \$65/sf in excess of 100 sf and are based on a comparison analysis of the comps used in this report.

Adjustments made of finished basement areas are calculated at approximately \$45/sf for differentials in excess of 100 sf and are rounded to the nearest \$500. No additional adjustments are made for basement room count or type due to lack of market support for the differentials presented at this time.

Parking amenities adjustments are made at approximately \$10,000 per garage space and are based on a comparison analysis of the comps used in this report. Carport spaces and driveway count spaces are not given any adjustments due to lack of market support for these additional features at this time.

Adjustments made for additional amenities including workshops, guest house (ADU), <u>OWNED</u> and paid-in-full solar utilities, and/or in-ground pools are based on a group data analysis and a comparison analysis of the comps used in this report to reflect the current estimated market reaction to each of these additional features within the subject's neighborhood at this time. Comp 1 reflects a larger 1,500 sf workshop and is therefore given a downward adjustment for this upgraded amenity. Comp 3 reflects a smaller workshop similar to the subject.

Supplemental Addendum

Borrower	Sample Borrower						
Property Address	Sample Report 2						
City	Chandler	County Maricopa	State	AZ	Zip Code	85224	
Lender/Client	Sample Lender/Client						

***Due to the limited number of more similar and current comparable sales available in the market at this time, it is necessary in some cases to reflect an unadjusted comparable sales price range in excess of 25%, as well as to make single line adjustments in excess of 10%, net adjustments in excess of 15% and/or gross adjustments in excess of 25% in order to adequately reflect the estimated market reaction to differentials presented between primary value indicators and units of comparison in the area at this time.

***It is also necessary in some cases to use sales located in excess of 1 mile from the subject property, sales located outside of the subject's neighborhood boundaries in competing markets in neighboring cities such as Tempe, dated sales reflecting a contract date in excess of 6 months prior to the effective date of this appraisal, as well as sales reflecting GLA differentials in excess of 25% of the subject's GLA. The use of such sales in necessary given the limited number of more similar current and/or more proximal sales available in the subject's market area at this time. Sales located in excess of 1 mile or outside of the subject's neighborhood boundaries are considered to be located in similar competing developments within the subject's overall market area. No additional neighborhood location adjustments are made for sales located in excess of 1 mile, or sales located in the neighboring city of Tempe due to lack of market support for these differentials at this time. No market conditions adjustments are made for dated sales given the stable current sales trends being seen in the area in the last 12 months.

• URAR: Reconciliation - Reconciliation and Final Value Conclusion

1. Primary consideration is given to the sales comparison approach as it is considered the most credible, relevant, and reliable approach to value for this specific property type, market, and assignment type within this neighborhood. It is considered to best gauge typical buyer/seller market activity in today's open and competitive marketplace, and is therefore considered the best representation of fair market value for the purposes of this appraisal assignment.

2. Given the subject's actual age, and due to a lack of relevant comparable vacant land sales in the market at this time, the extraction method was primarily relied upon to determine the subject's site value for the purposes of this appraisal. Therefore, least weight is placed on the cost approach to value which is included for informational purposes per client request only. The cost approach is not intended to be used for insurance purposes.

3. The income approach was considered in this assignment. However, the subject is a single-family residential dwelling located in a market area where there is insufficient current comparable rental data for similar home sales that would allow the appraiser to produce a reliable estimate of market rent and a GRM for the subject at this time. The subject is located in a neighborhood where owner occupied dwellings are the predominant trend as primary residence. Therefore, because it could not be reliably developed for the purposes of this appraisal, the income approach is given no weight and has been omitted.

Predominant value in the subject's neighborhood is derived from overall property sales noted during the market analysis which typically make up the majority of this neighborhood, and are typically smaller in GLA, smaller in lot size, and reflect a Q4 quality rating with less additional amenities including basements, guest house and in-ground pools. Differentials between subject's final appraised value and predominant values are typical in this area and do not represent any adverse effect on the marketability of the subject at this time. Subject is not considered to be an over improvement, and is within the typical age and value range for the neighborhood at this time.

Subject's final appraised value within the comparable value range primarily reflects the subject's overall condition, location, design, GLA, lot size, parking amenities, guest house amenities, and site amenities under the current stable market conditions.

A reasonable exposure time for the subject property at the estimated opinion of value indicated as of the effective date of the appraisal is approximately within 1-180 days on market. This estimated exposure time is based on a market analysis completed for the subject's market area during the course of this assignment and includes closed sales utilized in the sales comparison analysis which best reflect typical buyer/seller market activity most similar to the subject under the current market conditions. See form 1004 MC addendum for additional data and analysis.

Primary supporting consideration is placed on comps 1-4 for their respective similarities to the subject at this time. Comp 1 is a single level dwelling, however is similar in GLA located on the same street as the subject in the development, and has a similar lot size as the subject. Comp 2 is similar in condition to the subject and reflects a similar overall design. Comp 3 is similar in GLA and is a two-story dwelling similar to the subject. It is similar in condition with a basement. Comp 4 has a basement and a guest house similar to the subject and is a very current sale.

Secondary supporting consideration was given to comps 5-9 which are included for additional support of marketability throughout the area, as well as support for market reaction to differentials between units of comparison and primary value indicators. These comps were also utilized for additional bracketing purposes for specific features, amenities and line items in the sales comparison analysis. Comp 5 is larger in GLA with a Q2 quality rating, no basement or guest house however is included as an additional sale located within the subject's development. Comp 6 reflect more significant differentials overall from the subject and is used as an additional guest house comp for additional bracketing purposes. Comp 7 is use as an additional two-story design comp. Comp 9 is only included to bracket the subject's parking amenities due to the limited number of more similar and comparable sales available in the market without garage spaces similar to the subject.

Summary of Scope of Work:

Upon the appraiser's acceptance of this assignment, the assignment, the intended use and intended user of this appraisal report were identified. The subject property was also properly identified using property specific data available through Maricopa County public tax record, ARMLS (if available), various internet mapping sources, and City and County website databases. Such data typically includes zoning information, flood zone designation, property specs, location, age, tax information, owner information, lot size, last transfer information, room count, parking amenities, site amenities, and gross living area. Using this information, the appraiser has compiled a preliminary property profile which was utilized to complete a market analysis in order to identify current sales trends and market conditions in the identified neighborhood and market area as it would relate to the subject. This information was then utilized to search for and identify similar comparable sales within the market which are considered the most relevant for use for comparison to the subject property for the purposes of this appraisal. The appraiser has completed an interior and exterior property inspection to verify relevant information and property specific data contained in public record while noting the subject's overall condition, design, quality of construction, size, functional utility, and any additional features, amenities, external influences, physical depreciation, and/or functional obsolescence . Measurements, field notes, and photographs were taken by the appraiser during the inspection. The subject property improvements were measured by the appraiser using an industry standard laser measuring device and measuring tape. The subject improvements were measured in accordance with the ANSI Z765-2021 standard for measuring and calculating the finished and/or unfinished square footage of residential dwellings.

All of the collected information is reported and intended to best describe the subject property for the purposes of this appraisal, and was utilized to identify the subject's highest and best use "as-is." This information was also used to create a more complete property profile which was utilized to verify the selection and relevance of the comparable sales chosen for use in this report to best represent the subject's potential marketability. Unless stated otherwise in the sales comparison comments section and photograph section of this report, the sales deemed most relevant for use in this report were all inspected from the street and were photographed by the appraiser at the time of inspection. The appraiser verified all of the comparable sales' data and sales transfer information against Maricopa County public record, agents and/or property owners when necessary, and/or city and county databases. The sales data was then analyzed, adjustments were made where necessary based on market reaction to differentials between primary value indicators, comments were included throughout for report to provide clarity to the reader of the report, and an opinion of value was derived. This value conclusion is conveyed in the Reconciliation of Value section of this report. The report was reviewed, signed, and delivered to the client/intended user specified within the report.

Additional, and more detailed comments and addenda regarding the scope of work for this specific assignment are located throughout this report within their respective reporting sections. Such comments and addenda include but are not limited to: Additional details with regards to the extent of the property inspection, building sketch diagram, extraordinary assumptions and/or hypothetical conditions if applicable, the appraiser's certification, statement of assumptions and limiting conditions, definition of market value, UAD definitions, consideration and reconciliation of quality and quantity of market data and value indicators, as well as reconciliation of approaches to value, analysis of neighborhood and market area, USPAP disclosures, maps, photos, insurance, and license addendums. This report is intended to be read in it's entirety in order to fully and adequately understand the results, opinions and conclusions contained throughout. Areas of this report which state "County Record" as a data verification source are stated as such due to limited reporting space, and are to be understood as Maricopa County Records.

Extent of Appraisal Inspection and Scope of Work Comments:

The appraiser made a personal interior and exterior inspection of all readily accessible areas of the subject property improvements. Appraiser did not make entry into attic scuttle or crawl space, and did not move any personal property or furniture. Appraiser has noted all readily observable conditions of the subject property, that is, conditions that are immediately noticeable and discernible during a typical site visit. Appraiser is not responsible for determining the functionality of appliances or mechanical systems, however, it appears upon visual inspection that all appliances are installed and in good condition. The appraiser is not a home inspector, and this appraisal report is not a home inspection; the appraiser only performed a visual observation of accessible areas and the appraisal report cannot be relied upon to disclose conditions and/or defects in the property. The overall scope of work for this assignment is defined by the assignment and report type and is contained throughout herein. See attached Appraiser Certification, Appraisal and Report Identification Addendum, Statement of Limiting Conditions, Maps, Photos, Diagrams, Licenses, and Supplemental Addendum for additional comments, data and analysis with regards to the scope of work for this assignment

Appraisal Is Not An Engineering or Property Inspection Report - The reader of this appraisal report should understand that purchasing/owning a home entails a certain amount of risk. Properties may have latent problems that are concealed or otherwise not detectable at the time of the sale, or at the time it is inspected, regardless of the purpose of appraisal. Many properties have hidden problems, or may develop structural problems after a sale, new construction, or after an appraisal is performed. The appraisal should not be considered a report on the physical items that are a part of this property. Although the appraisal may contain information about the physical items being appraised (including their adequacy and/or condition), it should be clearly understood that this information is only used as a general guide for property valuation and is not intended to be used to evaluate the condition or adequacy of the subject property. The observed condition of the foundation, roof, exterior walls, interior walls, floors, heating systems, plumbing, insulation, electrical service and all mechanicals and construction is based on casual and typical appraiser's inspection only and no detailed inspection was made. Although the appraiser did exercise due diligence at the time of inspection, the appraiser is not acting as a professional engineer; builder, surveyor or other inspector, and qualified professionals should be consulted if there are any questions as to the condition or structural integrity of the subject property

Lender/Client	Sample Lender/Client						

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have researched the subject market area and have selected a minimum of three recent sales of properties most similar and proximate to the subject property for consideration in the sales comparison analysis and have made a dollar adjustment when appropriate to reflect the market reaction to those items or significant variation. If a significant item in a comparable property is superior to, or more favorable than, the subject property, I have made a negative adjustment to reduce the adjusted sales price of the comparable and, if a significant item in a comparable property is inferior to, or less favorable than the subject property, I have made a positive adjustment to increase the adjusted sales price of the comparable.

2. I have taken into consideration the factors that have an impact on value in my development of the estimate of market value in the appraisal report. I have not knowingly withheld any significant information from the appraisal report and I believe, to the best of my knowledge, that all statements and information in the appraisal report and true and correct.

3. I stated in the appraisal report only my own personal, unbiased, professional analyses, opinions, and conclusions, which are subject only to the contingent and limiting conditions specified in this form. I certify that, to the best of my knowledge and belief: The statements of fact contained in this report are true and correct. The report analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions, and are my personal, impartial, and unbiased professional analyses, opinions and conclusions.

4. I have no present or prospective interest in the property that is the subject of this report, and no personal interest with respect to the parties involved. I did not base, either partially or completely, my analysis and/or the estimate of market value in the appraisal report on the race, color, religion, gender, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or the present owners or occupants of the properties in the vicinity of the subject property.

5. I have no present of contemplated future interest in the subject property, and neither my current or future employment nor my compensation for performing this appraisal is contingent on the appraised value of the property.

6. My engagement in this assignment was not contingent upon developing or reporting predetermined results. My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.

7. My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Uniform Standards of Professional Appraisal Practice in place, as of the effective date of this appraisal, with the exception of the departure provision of those Standards, which does not apply. I acknowledge that an estimate of a reasonable time for exposure in the open market is a condition in the definition of the market value and the estimate I developed is consistent with the marketing time noted in the neighborhood section of this report, unless I have otherwise stated in the reconciliation section.

8. I have made a personal inspection of the property that is the subject of this report. I further certify that I have noted any apparent or known adverse conditions in the subject improvements, on the subject site, or on any site within the immediate vicinity of the subject property of which I am aware and have made adjustments for these adverse conditions in my analysis of the property value to the extent that I had market evidence to support them. I have also commented about the effect of the adverse conditions on the marketability of the subject property.

9. No one provided significant professional assistance to the person signing this report.

If I relied on significant professional assistance from any individuals in the performance of the appraisal or the preparation of the appraisal report, I have named such individual(s) and disclosed the specific tasks performed by them in the reconciliation section of this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in the report, therefore, if an unauthorized change is made to the appraisal report, I will take no responsibility for it.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: Buyer and seller are typically motivated. Both parties are well informed or well advised, and acting in what they consider their best interests. A reasonable time is allowed for exposure in the open market. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

СЗ

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes. Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.

TOTAL Sketch by a la mode	Area Calculations Summary	
Living Area		Calculation Details
First Floor	2003.95 Sq ft	$26 \times 15.33 = 398.67$ $28.67 \times 9.5 = 272.33$
		$21.75 \times 7.5 = 163.12$
		$46.1 \times 21.75 = 1002.59$
		$0.5 \times 0.07 \times 21.75 = 0.77$
		$9.33 \times 5.33 = 49.78$
		5.33 × 2 = 10.67
		$0.5 \times 2 \times 2 = 2$
		$0.5 \times 2 \times 2 = 2$
		4 × 25.5 = 102
		$0.5 \times 4 \times 0.01 = 0.03$
Second Floor	1171.22 Sq ft	31.42 × 17.33 = 544.56
		$19.75 \times 7 = 138.18$
		$0.5 \times 6 \times 0.08 = 0.24$
		$25.75 \times 18.92 = 487.17$
		$0.5 \times 25.75 \times 0.08 = 1.07$
Total Living Area (Rounded):	3175 Sq ft	
Non-living Area	224.00 0 0	5 02 × 0 5
Covered Porch	234.96 Sq ft	$5.92 \times 9.5 = 56.21$
		32.5 × 5.5 = 178.75
Balcony	538.83 Sq ft	$31.5 \times 5.67 = 178.5$
		31.33 × 5.5 = 172.36
		$26 \times 5.58 = 145.16$
		$0.5 \times 0.08 \times 25.75 = 1.07$
		$6.92 \times 6 = 41.5$
		$0.5 \times 0.08 \times 6 = 0.24$
Ramada	168 Sq ft	14 × 12 = 168
Shed	239.08 Sq ft	$12.58 \times 19 = 239.08$
Covered Patio	80.5 Sq ft	15.33 × 5.25 = 80.5
Covered Patio	939.69 Sq ft	39.92 × 19.67 = 785.03
		$9.5 \times 4 = 38$
		$23.92 \times 4.84 = 115.74$
		$0.5 \times 23.92 \times 0.08 = 0.93$
Fireplace	21.33 Sq ft	8 × 2.67 = 21.33
Workshop	227.17 Sq ft	7.83 × 29 = 227.17
Basement	636.78 Sq ft	$25.98 \times 24.5 = 636.56$
		$0.5 \times 0.02 \times 24.5 = 0.2$
		$0.5 \times 24.5 \times 0 = 0.02$
Guest House	742.67 Sq ft	$15.58 \times 29 = 451.92$
	•	23.42 × 12.42 = 290.75

Appraiser Independence Certification

I do hereby certify, I have followed the appraiser independence safeguards in compliance with Appraisal Independence and any applicable state laws I may be required to comply with. This includes but is not limited to the following:

- I am currently licensed and/or certified by the state in which the property to be appraised is located My license is the appropriate license for the appraisal assignment(s) and is reflected on the appraisal report.
- I certify that there have been no sanctions against me for any reason that would impair my ability to perform appraisals pursuant to the required guidelines.

I assert that no employee, director, officer, or agent of <u>Sample Lender/Client</u>, or any other third party acting as joint venture partner, independent contractor, appraisal management company, or partner on behalf of <u>Sample Lender/Client</u>, influenced, or attempted to influence the development, reporting, result, or review of my appraisal through coercion, extortion, collusion, compensation, inducement, intimidation, bribery, or in any other manner.

I further assert that <u>Sample Lender/Client</u> has never participated in any of the following prohibited behavior in our business relationship:

- 1) Withholding or threatening to withhold timely payment or partial payment for an appraisal report;
- 2) Withholding or threatening to withhold future business with me, or demoting or terminating or threatening to demote or terminate me;
- Expressly or impliedly promising future business, promotions, or increased compensation for myself;
- Conditioning the ordering of my appraisal report or the payment of my appraisal fee or salary or bonus on the opinion, conclusion, or valuation to be reached, or on a preliminary value estimate requested from me;
- 5) Requesting that I provide an estimated, predetermined, or desired valuation in an appraisal report prior to the completion of the appraisal report, or requesting that I provide estimated values or comparable sales at any time prior to my completion of an appraisal report;
- 6) Provided me an anticipated, estimated, encouraged, or desired value for a subject property or a proposed or target amount to be loaned to the borrower, except that a copy of the sales contract for purchase transactions may be provided;
- 7) Provided to me, or my appraisal company, or any entity or person related to me as appraiser, appraisal company, stock or other financial or non-financial benefits;
- Any other act or practice that impairs or attempts to impair my independence, objectivity, or impartiality or violates law or regulation, including, but not limited to, the Truth in Lending Act (TILA) and Regulation Z, or the USPAP.
