Re: Property: 4656 Monticello Pl Missoula, MT 59808 Borrower: File No.: 23146

In accordance with your request, I have personally inspected and appraised the above referenced property. The appraisal was developed and the report was prepared in accordance with the Uniform Standards of Professional Appraisal Practice and is contingent upon the certification and limiting conditions attached.

The Intended Use is to evaluate the subject property for a mortgage finance transaction. The Purpose of this appraisal is to provide an opinion of the market value, as defined in this report, of the subject property in unencumbered fee simple title of ownership. The Intended User of this appraisal report is the Lender/Client as noted herein. The scope of work is addressed throughout this report.

This report is based on a physical analysis of the site and improvements, a locational analysis of the neighborhood and city, and an economic analysis of the market for properties such as the subject. The attached summary report contains the description, analysis and supportive data for the conclusions, final estimate of value, descriptive photographs, limiting conditions and appropriate certifications.

Thank you for the opportunity to serve your needs. Please do not hesitate to contact me if you have any questions or if I can be of additional service to you.

Respectfully submitted.

# Uniform Residential Appraisal Report

311-2621781 File# 23146

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

Uniform Residential Appraisal Report

#### APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

#### FHA

This report must be made "subject to" – if a repair or defect affects the 3 "S" Rule – 1. Safety 2. Soundness 3. Security. Subject property must be compliant with HUD Handbook 4000.1 – including all applicable mortgage letters.

I have performed a visual observation of the readily accessible areas of the subject. Utilities were on and all mechanical systems were working at time of walk through. The attic and crawl space were viewed to insure FHA/HUD guidelines were met. The appraiser is not qualified to report possible building code violations, structural integrity problems, pest control issues, mold detection, or to determine other hazardous contamination. An appraiser's inspection is limited to readily observable conditions and is not as comprehensive an inspection as one performed by a licensed home inspector. The appraisal does not indicator guarantee whether smoke detectors and CO detectors are present or functional. The utilities were on and functioning at the time of inspection. Appliances were present and functioning at the time of appraisal. This appraisal cannot be relied upon to disclose all possible defects in the property and should not be considered to be a home inspection. The subject meets HUD minimum property standards.

#### Intended User/Use of the appraisal:

The Intended User of this report is the Lender/Client. The Intended Use is to evaluate the property that is the subject of this appraisal for a mortgage finance transaction, subject to the stated Scope of Work, purpose of the appraisal, reporting requirements of this appraisal report form, and Definition of Market Value. The intended use of function of all appraisals prepared for FHA is to support the underwriting requirements for an FHA-insured mortgage Use of the Appraisal – The use of the appraisal is to support FHA's decision to provide mortgage insurance on the real property that is the subject of the appraisal. Therefore, intended users include the lender and HUD/FHA.

#### Scope of Work:

The following steps were taken in arriving at the final estimate of value. After receiving a written appraisal request, a preliminary search of available resources was made to determine basic subject data, market trends, and other factors pertinent to the value of the subject.

Measurements of the subject were taken using the Square Footage Method for Calculating: ANSI Z765-2021 Standards (American National Standards Institute).

The data reported in this summary appraisal report has been verified, as applicable, with the following sources: the local Multiple Listing Service, County Clerk & Recorder's Office, County Treasurer, Surveyor's Office, Office of Planning and Grants, Department of Public Works, Montana CAMA database, and FEMA. Sales were examined and comparables were viewed from the exterior.

This is an Appraisal Report. The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the requirements of the Uniform Standards of Professional Appraisal Practice.

I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

I have performed this appraisal in accordance with the requirements of Title XI of the Financial Institution Reform, Recovery and Enforcement Act of 1989, (12 U.S.C.3331 et seq.), and any implementing regulations.

#### Highest and Best Use:

Highest and best use was analyzed with factors such as location, zoning, site size, neighborhood and market trends. Highest and best use is commonly defined as the use that supports the highest value as of the date of the appraisal that is physically possible, financially feasible, and legally permissible.

The subject is a single family residential home located in a predominately residential neighborhood. The improvements integrate well with the site and conform to the neighborhood in terms of style, utility, use and construction. The properties surrounding the site are similar in type and appeal to the market. The most probable buyer of this improved site would likely keep using the improvements the way they exist rather than demolishing or making major modifications to the improvements. Therefore, the highest and best use of the subject property is its current use due to the fact that it is located in an area of similar conforming properties and there is no indication of any major change in the foreseeable future. The subject site highest and best use as vacant and as improved as derived from the market and current zoning is single family residential. There are no indications that land use would change in the near future.

#### Three Approaches to Value:

The Sales Comparison Analysis is based on the principle of substitution which essentially states that a willing buyer will pay no more for a property than the cost of acquiring a similar property and is the primary indicator of value. Comparables are selected based on whether a buyer for the subject would consider the comparable as a reasonable alternative. Buyers emphasize GLA over style and therefore no adjustment is made for style (Split-level versus Ranch).

The Cost Approach is based on replacement cost which is figured by determining land value, as determined by MLS data, and square footage cost figures using The Marshall & Swift Cost Handbook.

The Income Approach is generally used for investment properties. As single family residences are less likely to be purchased for investment purposes, the use of the income approach will be used at the request of the client on non-owner occupied residences. The income approach is not used if there is lack of sufficient data, the subject is owner occupied, and is generally considered to be less reliable than the Cost or Sales Comparison Approach.

#### **Uniform Appraisal Dataset (UAD)**

This report has been prepared in compliance with UAD from Fannie Mae and Freddie Mac. The UAD requires the appraiser to use standardized responses that include specific formats, definitions, abbreviations, and acronyms (please see UAD Definitions Addendum).

The appraiser attempted to obtain an adequate amount of information in the normal course of business regarding the subject and comparable properties. Some of the standardized responses required by the UAD, especially those in which the appraiser has not had the opportunity to verify personally or measure, could mistakenly imply greater precision and reliability in the data than is factually correct or typical in the normal course of business and should be considered an estimate. Examples include condition and quality ratings as well as comparable sales and listing data. The appraiser makes no representations, guarantees

Lender	Mann Mortgage, LLC						

or warranties, express or implied, regarding building materials, their fitness, quality, condition or remaining economic life. Not every element of the subject property was viewable. Comparable data was generally obtained from third-party sources including but not limited to the local MLS, Montana Department of Revenue Assessor, and county records.

#### URAR : Neighborhood - Market Conditions

Missoula is located at the junction of 5 valleys and is one of the largest cities in Montana and is a commerce center for the western region of the state. Major employers include: University of Montana, U.S. Forest Service/Federal Government, Retail/Service, Medical Industry including 2 regional hospitals, and Tourism.

The Annual Economic Outlook Seminar is presented by the University of Montana's Bureau of Business and Economic Research each January. In addition, the Missoula Housing Annual Report is released each April by the Missoula Organization of Realtors (available online at www.MissoulaRealEstate.com/market-trends). Data from these and additional sources as cited are summarized below.

According to the US Census Bureau, the population of Missoula county (2,618 square miles) is approximately 121,630 and the population of the city of Missoula is 76,848. Over the past 15 years, studies in population trends have shown an increase of about 1% to 2% per year.

Unemployment rates are typically below national averages and as of December 2021, the official Unemployment rate of Missoula was 1.3% (according to the US Department of Labor http://www.bls.gov/eag/eag.mt\_missoula\_msa.htm). Missoula follows national trends but is generally delayed and somewhat moderated.

A limited supply of real estate listings, low rental vacancy rates and limited new development in the City of Missoula as well as low mortgage interest rates, the zoom economy, and federal stimulus resulted in a trend of increasing real estate prices.

Property management companies reported annual vacancy rate of 1.2% in 2022. Missoula County's housing occupancy is estimated to be 58% owner occupied and about 47% owner occupied in the city of Missoula which is typical of a university community. About half of rental units are owner managed. Rent increased in all types of rental categories in the past year. In 2022, average rent increased 11.4% over the prior year.

The median sales price has increased steadily over the past several years: 2008 (-2.1%), 2009 (-2.9%), 2010 (-4.0%), 2011 (+2.2%), 2012 (+2.3%); 2013 (+2.5%); 2014 (+4.7%); 2015 (+6.1%); 2016(+6.8%); 2017(+5.2%); 2018 (+8.1%), 2019 (+8.6%), 2020 (+10.6%), 2021(22.9%), 2022 (+15.5%).

In 2022, the median sale price of a home was \$520,000. The market continued to experience a shrinking availability of homes priced under \$350,000. At the end of 2022, every neighborhood across the city had a supply of less than 3 months. Home prices have cooled due to higher interest rates jumping from 3% at the beginning of 2022 to over 6% by the end of 2022. First Quarter 2023 trends indicate that there is an undersupply of homes priced under \$750,000; whereas homes priced over \$750,000 have 9 months of supply and that the largest supply gap is in the \$300,000 to \$600,000 range. In 2022, the volume of home sold in Missoula was down 12.5% and was the lowest volume sold since 2012. First Quarter of 2022 had a higher median sale price than the following 3 quarters, but year over year median sale price was still up 15.5%. Median lot sale price in Missoula was \$162,500 in 2022 up \$100,000 since 2012. Over 400 new low income qualified units will be coming online in 2023.

Montana is a non-disclosure state and sales data is generally only available through the Multiple Listing Service. In the city of Missoula, distress sales represent a small percent of the local market's total stock. In Missoula, foreclosures have continued to be minimal.

Missoula has a season influence due to winter conditions that typically produce a reduced number sales during the winter months which may skew statistical trends. There is a general slow down in activity during the winter months that can extend typical marketing and exposure times since the peak selling period is spring through fall. Multiple offers with bidding wars that were common during the pandemic years have ceased and higher mortgage interest rates have had a big impact on affordability and motivation to move. The housing market has slowed, however, demand continues to outpace supply below \$750,000.

#### Subject Neighborhood Market Conditions/Appraisers Comparable Search Parameters:

According to MLS, there have been 33 sales in the subject's neighborhood (defined as MLS Area bounded as described in the neighborhood section) within the past 12 months ranging from \$337,500 to \$510,000; median sales price \$400,000; 41 median dom. In the prior year there were 27 sales ranging from \$285,000 to \$392,500; median sales price \$400,000; 43 median dom. Currently there are 6 active listings (including 4 under contract, representing a supply of 1 month) ranging from \$369,000 to \$499,000; median list price \$450,000.

# UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

#### Condition Ratings and Definitions

#### C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

#### C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

#### СЗ

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

#### C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

#### C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

#### C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

#### Quality Ratings and Definitions

## Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

#### Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

#### UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

#### Quality Ratings and Definitions (continued)

#### Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

#### Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

#### Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

#### Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

#### Definitions of Not Updated, Updated, and Remodeled

#### Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes. Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

#### Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

#### Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

#### Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

#### Example:

3.2 indicates three full baths and two half baths.
